# Market Summary

## Economic Conditions

- Volatility in the equity markets grabbed the headlines again amid threats of a possible trade war, but indications of strong economic fundamentals continue to fuel domestic and global expansion.
- Strong personal consumption and business investment drove fourth quarter U.S. Gross Domestic Product (GDP), which was revised up to show growth of 2.9%. Estimates for 2018 GDP are for growth in the range of 2.5 to 2.8%.
- Inflation ticked upward, with overall growth in the Consumer Price Index (CPI) and Producer Price Index (PPI), and wage growth modestly rose.
- The Federal Open Market Committee (FOMC) hiked rates, as expected, raising the fed funds rate by 0.25% to a new range of 1.50 to 1.75%. Perhaps less expected was the notable improvement to the Federal Reserve's (Fed's) economic projections for GDP growth, unemployment, and inflation over the next three years. This raised the probability of multiple additional hikes in 2018.
- Job growth was disappointing in March, with only 103,000 jobs added, while unemployment held at 4.1% for the sixth straight month. For the first time ever, however, the number of job openings (6.3 million) now nearly equals the number of unemployed (6.6 million).

## Market Reaction

- The U.S. Treasury yield curve twisted in March, with yields on maturities two years and under increasing to new multi-year highs, while yields on longer maturities declined in response to the decline in equity prices. The yield of the two-year Treasury note rose two basis points (bps) to end the month at 2.27%, while the 10-year declined 12 bps to 2.74%.
- As a result of the flatter yield curve, performance of longer-term fixed-income indices dominated their short-term counterparts in March. The index of 10- to 15-year Treasuries returned 1.4% for the month, while the one- to three-year Treasury index returned 0.19%. For the quarter, however, 10- to 15-year Treasuries lost 2.3% while the one- to three-year index was down 0.14%.
- Risk aversion and heightened market volatility pushed credit spreads wider for the second consecutive month. The result was underperformance of most credit sectors relative to comparable U.S. Treasuries for both the month and the quarter.
- The mortgage-backed security (MBS) sector provided some reprieve for intermediate-term investors as lower coupon 15-year MBS indexes outperformed the majority of other comparable duration investment-grade fixed-income sectors. For the first quarter, however, most MBS indexes have underperformed.
