

Why Return Organics Processing to Sonoma County?

- Eliminate outhauling/importing of organics, thereby reducing climate change impacts
- Provide our community with locally produced, high-quality, affordable organic compost and mulch
- Help Santa Rosa and the region meet their own greenhouse gas emission reduction goals
- Provide a regional solution to SB 1383 requirements to divert organic materials, including food scraps, from the landfill to reduce greenhouse gas emissions
- Help build healthy soils and sequester carbon
